

Burriss Logistics and HCR Air Doors Remove All Obstacles

"Our HCR doors are an essential part of successfully operating our high-traffic Elkton, Maryland facility. HCR isn't right for every application, but those they do fit; there is no other door that will do the job. We performed a lot of field research before buying HCR, and we found that no other air door out there was comparable.

As for warehouse safety, I can say we have had no doorway accidents since our HCR doors were installed. The wide open

doorways give us the free-flowing atmosphere we need for an extremely busy environment.

In addition, we have not spent any money on our HCR doors since they have been installed. A few simple maintenance checks once or twice a year, and that's it. We see HCR as a major plus."

Burriss Refrigerated Logistics

Being an industry leader means embracing behind-the-scenes technologies that make a real competitive difference in today's fast-paced marketplace. Offering custom storage and transportation programs across multiple temperatures for a growing list of retailers, wholesalers, and processors takes dedication to the latest in technology and food safety.

At Burriss Logistics' new Elkton, Maryland facility, the focus was to build a warehouse that was energy-efficient, safe and ice-free, with a free-flowing and productive atmosphere to provide exemplary service.

And to stay ahead of the curve, Burriss Logistics relies on HCR Air Doors.
